

Guidelines for manufacture of MFs

Written by Petra Müllerová - Last Updated Monday, 08 March 2021 08:35

Specific guidelines are published in this section complementing requirements defined in the Decree No. 229/2008 Coll., on manufacture and control valid for manufacture and distribution of medicated feedingstuffs. General principles of GMP defined in the GMP Guide (see section in Manufacturing and control of VMPs) and its annexes are valid also in the area of medicated feedingstuffs manufacture and should be applied as appropriate.
