

Work location: Hudcova 56A, 621 00 Brno

The Laboratory carries out analyses of veterinary medicinal products incl. immunologicals, APIs and excipients in accordance with Article 16 of Law 378/2007 Coll., concerning regulation of medicinal products. Requirements of Directive 2001/82/EC as amended by Directive 2004/82/EC are implemented in this Law.

In the Laboratory there are used testing methods, techniques and assays according to the European Pharmacopoeia or methods approved in dossiers authorized Veterinary Medicinal Products.

The accredited methods applied are listed in [Accreditation](#) section.

The Laboratory also tests veterinary products, for example veterinary cosmetics, dietetics, diagnostics etc.
